Bringing sustainable infrastructure to urban areas

edited by Monique Abud

"The 20th century profoundly transformed our cities by seeking to adapt them to the automobile, a symbol of modernity, and thus encouraging speed and (individual) motorised travel."

<http://urbachina.hypotheses.org/9369>

The China Urban Sustainability Index 2013

edited by Monique Abud

The Urban China Initiative (UCI) has launched the 2013 Urban Sustainability Index (USI) Report, a 'tool to evaluate urban development, but also a reference for China's policy makers and city planners'.

<http://urbachina.hypotheses.org/9591>

Industrial renovation and transformation of old Chongqing Dadukou district

written by Chi-Han Ai

In 2013, Dadukou district is the only place in Chongqing that included in a national renovation plan proposed by the National Development and Reform Commission. The goal of the plan is to transform Dadukou into an "urbanised, social, economic" area.

More green spaces in Chinese cities?

written by Sebastien Goulard

Green areas have increased in Chinese cities for the last twenty years, but more qualitative efforts are needed.
