Contesting urban sustainabilities in China
edited by Monique Abud

Urban sustainability is linked to the two concepts of ecological modernisation and urban entrepreneurialism, which are reflected in the form of the ‘eco-city’ in urban China. But this concept remains unclear and controversial. The authors take the example of Shanghai’s Dongtan eco-city project to illustrate this point.

The Swedish production of sustainable urban imaginaries in China
edited by Jacqueline Nivard

Sweden and the broader region of Scandinavia have been widely praised for their efforts to develop and promote models of sustainability for the rest of the world to follow. Swedish international architecture and urban planning firms are driven by the advantage of being able to brand their projects as “Sustainable and Scandinavian”.

Analysis of the Detroit decline and its lesson for Chinese urbanisation
edited by Chi-Han Ai

Recently, a serious financial crisis hit the U.S. city of Detroit, and the Michigan state government announced the takeover of Detroit, the largest city in the United states to be taken over by the state government. DRC draws the lessons from the Detroit decline and give some suggestions for Chinese urbanisation (Article in Chinese).

Kunming, new high rise building
edited by Sebastien Goulard

Kunming, new high rise building
Modern and traditional architectural style in Kunming
http://urbachina.hypotheses.org/6200
Funded under the European Commission’s Seventh Framework Programme, UrbaChina is a collaborative project managed by a consortium of 11 leading Chinese and European research institutions. UrbaChina analyses China’s urbanisation trends for the next 40 years and define possible future scenarios with reference to concepts of sustainability.
